OBJECTIVE

Eager to turn knowledge into real impact by contributing to challenging projects and learning from industry experts. My long-term vision is to become a senior engineer who not only builds innovative solutions but also inspires and empowers others in the tech community.

EDUCATION

University of Transport and Communications, BS in Information Technology

Aug 2021 – Jun 2025

SKILLS

Programming: JavaScript, TypeScript, SQL

Databases: PostgreSQL, MongoDB

Tools: Git/GitHub, Postman

Frameworks: React, Next.js, Node.js, Tailwind CSS

DevOps: Docker, Linux

Languages: English (B1)

EXPERIENCE

Frontend Intern, Saigon Newport Corporation (SNP) – Ho Chi Minh City

Mar 2025 – Jun 2025

- Contributed to the development and maintenance of internal web applications using React and JavaScript.
- Assisted in integrating APIs from backend systems to ensure smooth data flow.
- Implemented responsive UI designs for cross-device compatibility.
- Collaborated in Agile teams, performing code reviews and source control with Git/GitHub.

Tech stack: React · JavaScript · Tailwind CSS · Git/GitHub

PROJECTS

Healthcare Management System

GitHub Repository

Tech stack: React · Next.js · Tailwind CSS · Prisma · PostgreSQL · Clerk

- Developed a full-stack healthcare platform enabling patients to book appointments, doctors to manage consultations, and admins to oversee activity.
- Implemented role-based authentication across 3 user roles and ensured secure, scalable data handling.
- Designed and deployed system architecture to ensure reliability, scalability, and smooth user experience.

Flight Booking Website

GitHub Repository

Tech stack: Next.js · React · CSS · Node.js · Express.js · MongoDB

- Built a flight booking platform supporting real-time search, booking management, and secure authentication.
- Implemented interactive airport mapping and delivered a responsive, user-friendly interface.
- Contributed to backend API design and optimized data handling for reliable transactions and smooth booking flow.

Realtime Chat App

GitHub - Demo

Tech stack: React.js · Node.js · Express.js · MongoDB · Socket.io · Tailwind CSS

- Developed a realtime chat application with React.js frontend and Node.js/Express backend.
- Integrated Socket.io for instant messaging, typing indicators, and online status.
- Designed MongoDB schemas for users, messages, and chat rooms to optimize data handling.
